

## PENN COMMERCIAL BUSINESS/TECHNICAL SCHOOL STUDENT ACHIEVEMENT RATES

The rates are as reported by Penn Commercial to ACCSC in the school's *2023 Annual Report*

Penn Commercial takes great pride in the success of our students. The following statistical information outlines graduation rate, employment rate and licensure rate for a given Penn Commercial program.

### EMPLOYMENT RATE METHODOLOGY

Penn Commercial calculates an employment rate for each program using a formula specified by our accrediting agency, the Accrediting Commission for Career Schools and Colleges (ACCSC). The employment rate formula uses a cohort of students who began school during a given 12-month reporting period and proceeded to graduate as the denominator. The numerator is composed of graduates in the cohort who self-reported employment in their field of training, or a related field, which was verified by the school. The rate is calculated for the cohort after 150% of the program length has elapsed for all students in the cohort, with an additional three-month allowance for placement related activities and three months for addition employment confirmation activities. Graduates who were excluded from this employment calculation fall into one of the following categories: further education at an accredited postsecondary institution on at least a half-time basis; death; incarceration; active military service deployment; onset of a medical condition that prevents employment; international students who have returned to their country of origin.
